Hira Agro Industry

Full-Stack Rice Mill E-Commerce Platform

From paper ledgers to a live platform — product catalogue, real GST billing, and multi-business management in one system.

12-Week Internship / Project Presentation

Presenter: **Sayam Mutha** | St. John College of Engineering and Management (IT Dept)

Mentor: **Mr.Vaibhav Patel** | Company: **Rigel Infotech**

About Rigel Infotech

Company profile and workplace exposure

Company Profile

- **Location:** Palghar, Maharashtra.
- **Industry:** Information Technology / Software Services.
- **Nature of Work:** IT solutions, software development, and technology-related services.

Key Exposure

- Software/IT development and programming concepts.
- End-to-end project implementation and debugging.
- Experiencing a professional work environment.

Phase 1: Web Development Basics

Building the foundation of web development

WEEK 1

Intro to Web Dev

Understand how websites work and learn the basic structural parts of a web page.

WEEK 2

Semantic Tags & CSS

Use semantic HTML tags properly, learn the CSS box model, and use Flexbox for styling.

WEEK 3

Media & Web Forms

Add images, links, and media to the site. Build simple forms and implement page anchors.

Phase 2: JavaScript & the DOM

Moving from static pages to interactive web behaviour

WEEK 4

JavaScript Revision

Revise fundamental JavaScript basics and successfully connect JavaScript logic to the HTML page.

WEEK 5

Dynamic Elements

Work directly with forms and dynamic elements, practicing DOM-based page changes.

WEEK 6

JS Project Work

Apply core concepts in a small project, heavily practicing problem-solving and code debugging.

Phase 3: Starting with React

Learning component-based UI development

WEEK 7

Introduction to React

Understand what React is primarily used for and learn the basic React development workflow.

WEEK 8

JSX & Components

Write JSX syntax fluently, build React components, and understand component-based UI.

WEEK 9

Fragments & UI

Use React Fragments correctly to keep the DOM clean and build reusable UI pieces.

Phase 4: Building Dynamic UI

Making interfaces interactive, reusable, and state-driven

WEEK 10

Components & Props

Understand component hierarchy deeply, pass data with props, and build dynamic UI elements.

WEEK 11

State with useState

Store changing values with useState() and understand re-rendering through practical projects.

WEEK 12

Conditional UI

Handle user interactions with events, using &&, ternary operators, and login status conditions.

Project Overview

Why This Platform?

Bringing the rice mill business fully online, from catalogue to accounting.

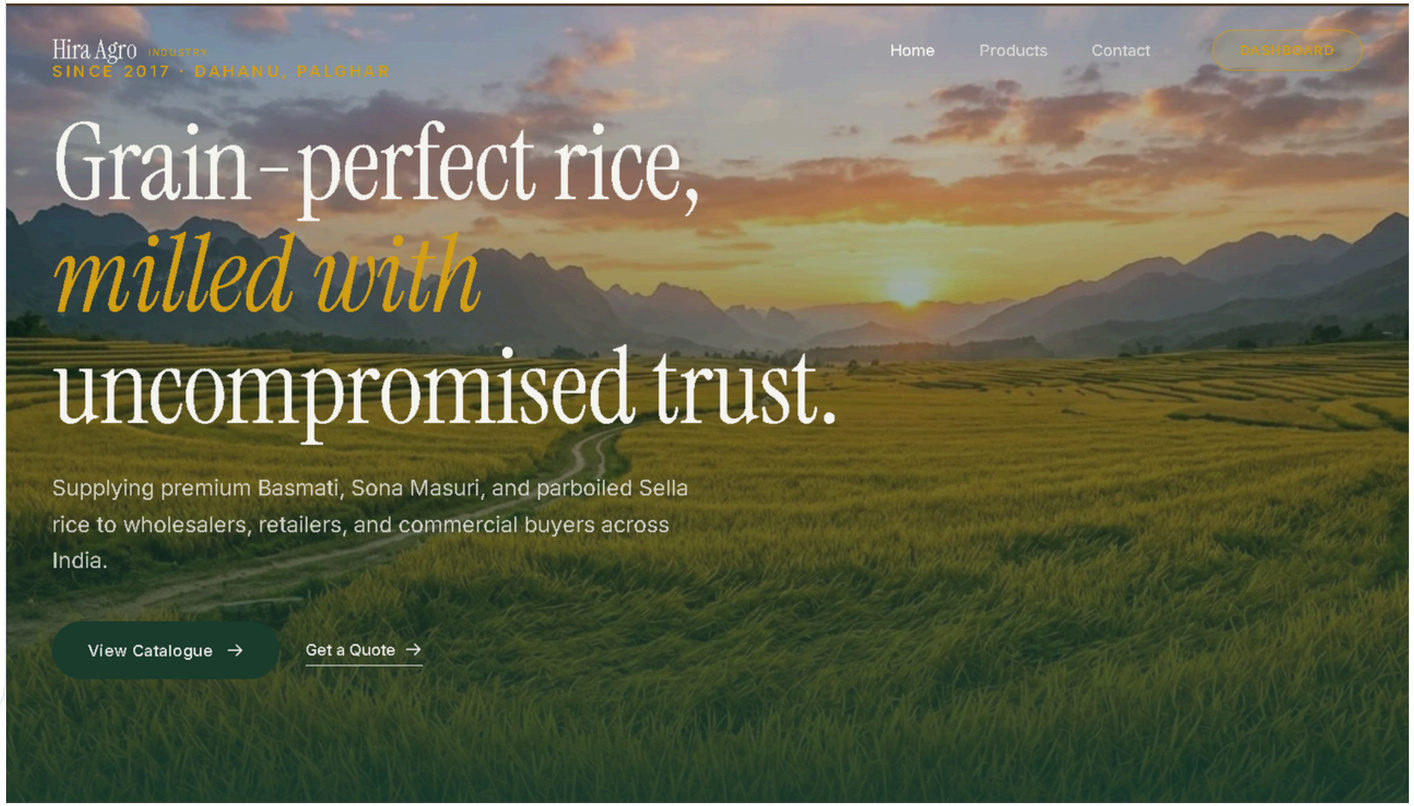

The Goal: Transitioning from slow, fragmented paper ledgers to a fast, unified full-stack web platform that automates the heavy lifting of daily accounting and stock management.

The Problem We Faced

Why the business desperately needed a digital upgrade

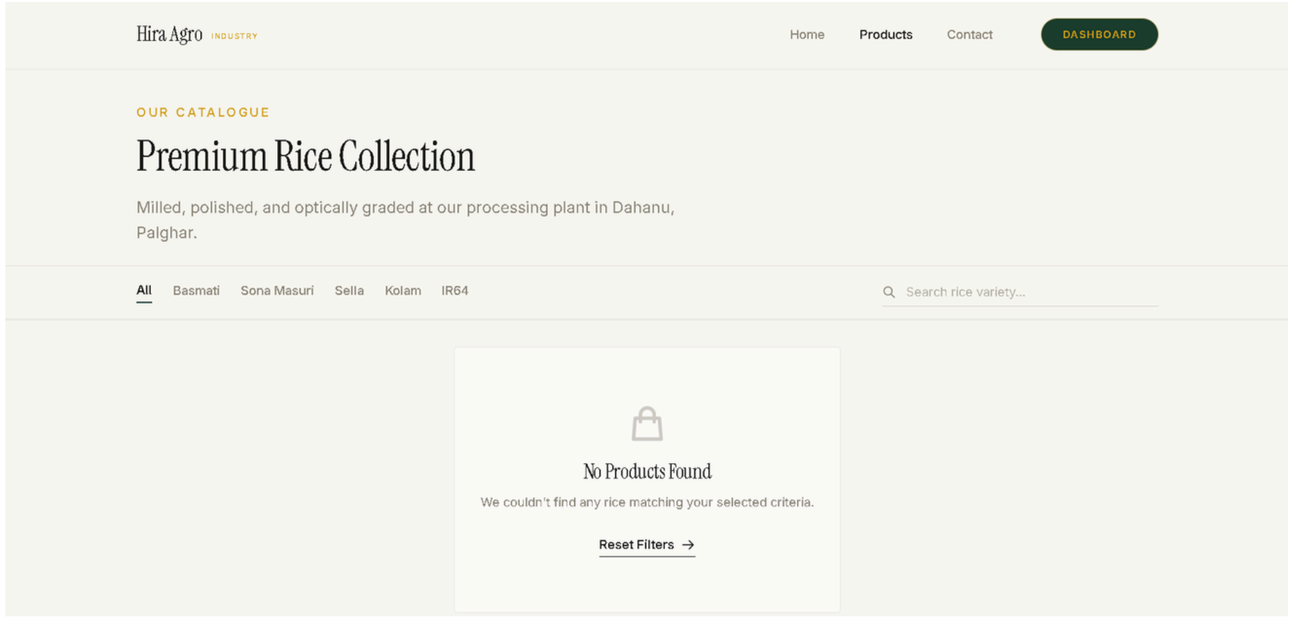

Key Challenges

- **Missing Digital Footprint:** No online presence — customers had no way to browse products or reach the business digitally.
- **Outdated Tracking:** Billing, stock, and sales (for 5 related Rice businesses) were tracked manually on paper.
- **Poor Visibility:** No centralized way to see stock levels, sales, or business performance at a glance.

Feature 1: Public Catalogue & Security

Making products accessible and securing business data

Digital Storefront

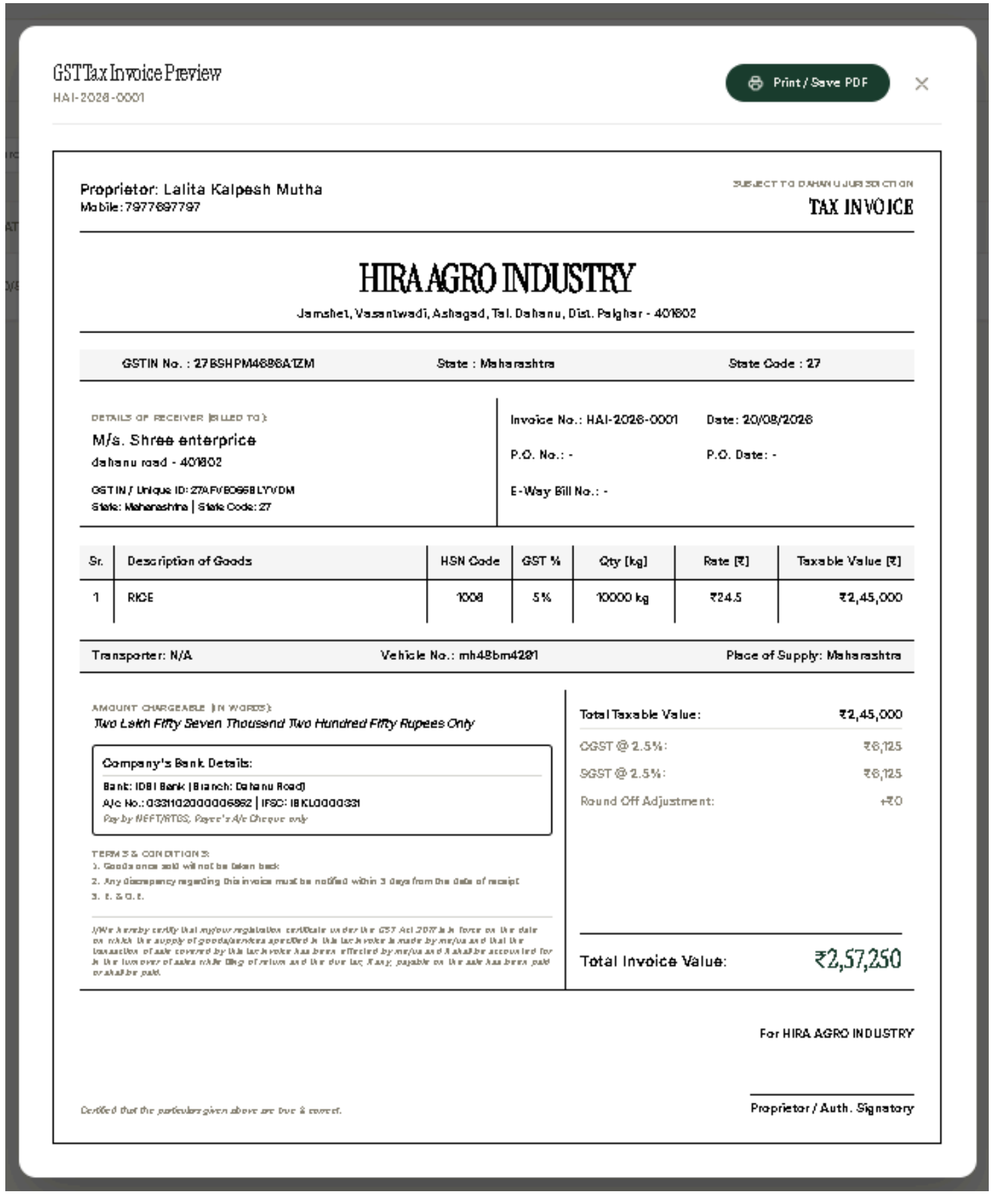

- **Public Catalogue:** Allows customers to browse rice varieties with live rates and stock status natively from their devices.
- **Role-Based Dashboards:** Implements separate Admin & Manager access to ensure sensitive internal data is only seen by authorized person.

Feature 2: Real GST Billing System

Replacing manual calculators with automated logic

Automated Accounting

- **Tax Automation:** The system intelligently auto-calculates taxes based on current GST guidelines and regional logic.
- **Professional Output:** Generates actual GST Tax Invoices and Bill of Supply documents that perfectly match the business's real letterhead format.

HIRA AGRO INDUSTRY

Jamshet, Vasantwadi, Ashagad, Tal. Dahanu, Dist. Palghar - 401602

GSTIN No. : 27BSHPM4686ATZM | State : Maharashtra | State Code : 27

DETAILS OF RECEIVER (BILLED TO):
M/s. Shree enterprice
dahanu road - 401602
GSTIN / Unique ID: 27AFVBO68LYVDM
State: Maharashtra | State Code: 27

Invoice No.: HAI-2026-0001 | Date: 20/08/2026
P.O. No.: - | P.O. Date: -
E-Way Bill No.: -

Sr.	Description of Goods	HSN Code	GST %	Qty [kg]	Rate [₹]	Taxable Value [₹]
1	RICE	1006	5%	10000 kg	₹24.5	₹2,45,000

Transporter: N/A | Vehicle No.: mh48bm4281 | Place of Supply: Maharashtra

AMOUNT CHARGEABLE (IN WORDS):
Two Lakh Fifty Seven Thousand Two Hundred Fifty Rupees Only

Company's Bank Details:
Bank: IDBI Bank | Branch: Dahanu Road)
A/c No.: 0331102000005982 | IFSC: IBKL0000331
Pay by NEFT/RTGS; Payee's A/c Cheque only

TERMS & CONDITIONS:
1. Goods once sold will not be taken back.
2. Any discrepancy regarding this invoice must be notified within 3 days from the date of receipt.
3. E. & O.E.

I/We hereby certify that my/our registration certificate under the GST Act 2017 is in force on the date on which the supply of goods/services specified in this tax invoice is made by me/us and that the transaction of sale covered by this tax invoice has been effected by me/us and it shall be accounted for in the turnover of sales while filing of return and the due tax, if any, payable on the sale has been paid or shall be paid.

Total Taxable Value:	₹2,45,000
CGST @ 2.5%:	₹6,125
SGST @ 2.5%:	₹6,125
Round Off Adjustment:	+₹0
Total Invoice Value:	**₹2,57,250**

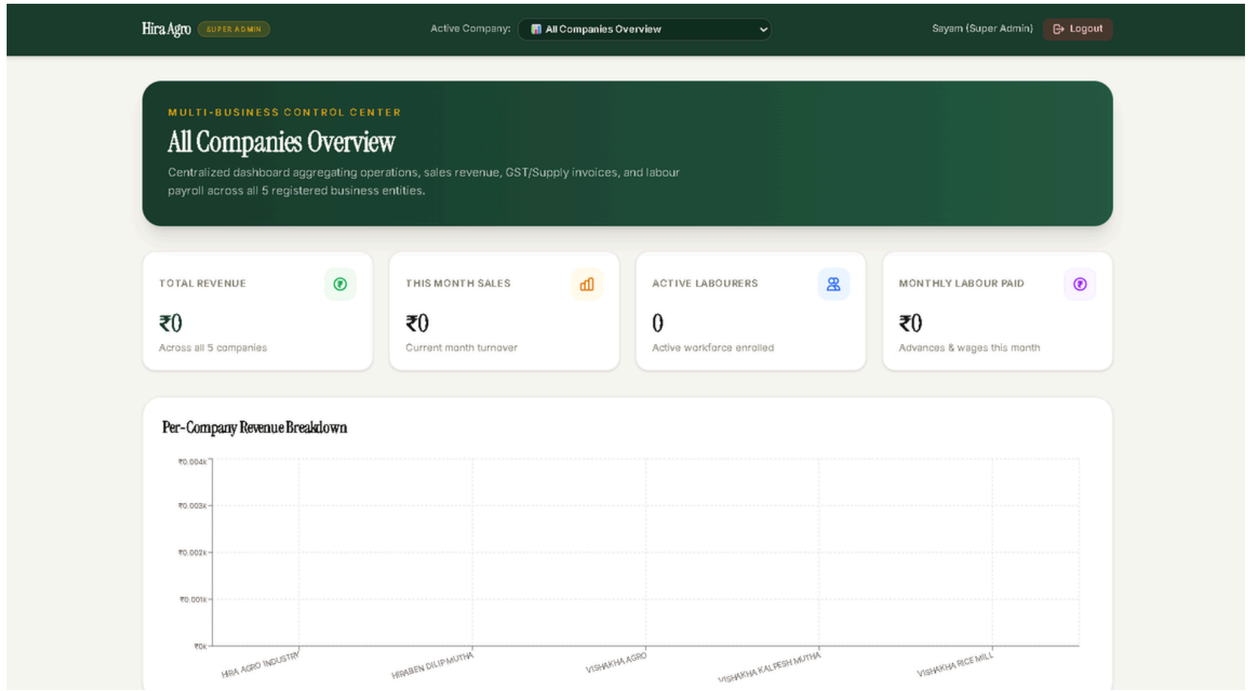

For HIRA AGRO INDUSTRY

Certified that the particulars given above are true & correct.

Proprietor / Auth. Signatory

Feature 3: Multi-Business Architecture

Scaling the solution across the entire enterprise

Unified Ecosystem

- **Multi-Business Support:** One central platform successfully serving 5 related family businesses without codebase duplication.
- **Centralized Management:** Eliminates the need to buy or manage separate software systems, keeping all enterprise data in one organized hub.

Real-World Impact

How the platform transforms daily operations.

Operational Efficiency

Saved countless hours of administrative work by automating GST invoicing and centralizing multi-business management into one dashboard.

Financial Accuracy

Significantly reduced manual accounting errors through automated tax calculation and standardized, error-free digital ledgers.

Digital Transformation

Successfully modernized a traditional, paper-based business model, opening new digital avenues for customer reach and catalog browsing.

Project Completion

Project Conclusion

Technical Growth: successfully bridged the gap between fundamental web development concepts and deploying a complex, state-driven React application. The 12-week internship culminated in a fully functional, production-ready platform that achieves all initial goals and serves real business needs.

Thank You!

Questions & Answers

Thank you for your time. The floor is open!

Implementation & Build

Feel free to ask about the theoretical concepts, the build process, or the tech stack choices.

Feedback Welcome

Suggestions, feature ideas, and feedback on the UI design are highly welcome.
